

We partner with great people to build thriving companies.

Enclave invests in family and founder-led businesses across the Southeast. We are values-first, Mississippi-based, and building for the long term.

INVESTMENT FOCUS

What we look for in a partner company.

We focus on businesses where our capital, relationships, and hands-on approach create the most value.

✓ Family or founder-owned

Businesses where the owner is looking for the right partner to thoughtfully transition ownership as part of the next chapter.

✓ Strong management team and culture

People who know the business and have the capacity to grow with it. We invest alongside existing teams and build on what is already working.

✓ EBITDA or cash flow of $1 million – $10 million

Businesses that have demonstrated consistent profitability and are positioned to grow it further with the right partner.

✓ Strong value proposition and market position

A clear reason for existing, a defensible market position, and real growth opportunities not yet fully realized.

✓ Southeastern United States

We focus on the region where our relationships and market knowledge are strongest. Preference for companies headquartered in Mississippi and surrounding states.
